# JOSHUA JAMES LTD. 2022

SINGLE HINGED DOOR WITH FIXED SIDE SCREEN  
CAMBRIDGE, CAMBRIDGESHIRE

LEAD TIME:  
7 WEEKS

PROJECT VALUE:  
£4,430 + VAT

# Design.

The clients of our Cambridge project were undergoing a refresh of their property when they reached out to us about acquiring a single door and side screen to divide their hallways from their kitchen/dining area. Given the open-plan nature of their home, the client wanted to be able to divide the space without losing the airy and connected feel that their property possessed.

Due to the layout of the surrounding space where the door was to be positioned, the client required a bespoke solution, whereby the door folded back around onto the side screen to save space and not interfere with the existing furnishings.

## SINGLE HINGED DOOR WITH FIXED SIDE SCREEN CAMBRIDGE, CAMBRIDGESHIRE

From the offset our clients were certain that they wanted four cross bars on their door to match the pattern on the existing wooden doors within their property (photo below), maintaining a congruent flow through their home.

They were also very keen to maximise the area of glass on the door set, therefore they opted for our Linear handle which does not require a lock block.

We suggested to run the handle between the Cross Bars, aiding the client to achieve the minimalistic design that they were looking for.

BEFORE

AFTER

Once again our InoCross20 Door range has provided the perfect solution, finishing off our client's internal refresh superbly.

The use of a single door with a fixed side screen in this space worked much better than the option of a double door set. This is due to the swing path of the doors and the position that they would sit in once open.

The addition of the door does not only allow the space to be closed off, it also acts as an acoustic barrier between the kitchen/diner and the open hallway which leads into the living area, allowing our clients to enjoy their different entertainment choices without the bother of sound interference from one another.

The slim profile of our InoCross20 door, with the frame measuring 20mm and the bead and Cross Bars only 15mm, provides the modern and minimalistic aesthetic that the client desired.

Post-installation, the clients said how they loved that as much as the door is new, it looks like it's been there forever.

CAMBRIDGE, CAMBRIDGESHIRE

Before finding us and reaching out, the client had originally spoken with a few other companies to find the best solution for their home. When we originally spoke with them informed us that some of the other companies had quoted significantly more, while others' designs were not of interest to them, using dated manufacturing and installation techniques that would not achieve the look and feel that they desired.

Even though the clients front door, wooden door frames and skirting boards were anthracite grey, they chose RAL 9005 (black) for the framework of their door. This complemented the door set by making it stand out, being one of the first things that you see when you enter the property.

Overall our Cambridge project was a huge success, the clients were over the moon with the finished result, as was our team.

# CLIENTS COMMENT.

---

"Faultless, exceeded our expectations, we cannot fault this Company, they have been excellent from start to finish. We are absolutely thrilled with our doors which exceeded our expectations. Every interaction was a positive one and we would not hesitate to recommend them."
